Everything Just Right

Let's face it, there are just too many mini bluetooth speakers out there. So we decided to make one that's better than all of them. One that looks special, and sounds like a real speaker.

The perfect size for perfect acoustics, and travel. Take it on a trip, leave it in your car, take it to the beach, even go jogging with it. The form is universally desirable.

Simple 3 button operation makes it a no brainer to use, and the top-firing speaker fills the room with an almost surround sound experience.

Including what's INSIDE...

Every music lover expects a speaker to sound reasonable, even if it's economical. But we took that expectation and raised it to another level.

We began with a precision amplifier working with a high density paper cone driver that delivers crisp highs and a tight mid-range. And then we added a bass radiator inside, to boost low frequencies. The result: a warm deep bass with precision highs and a rock solid vocal range. No other unit in the same price metric can achieve the signature sound this unit renders.

And no product is great if you run out of battery life, so we included a lithium polymer high capacity cell inside, for up to 6 hours of playback. We also added a mechanical standby switch which uses zero power, so the unit delivers an incredibly long standby time of 21 days, when you are not using it.

Beauty on the outside, real technology inside.

Contemporary and Stylish - Dynamic and Sporty

Designed to appeal to every age group, this Bluetooth Speaker is modern yet friendly, elegant yet sporty, sleek yet robust. It's carefully designed to remain attractive for generations. The precision tooled metal mesh grill that gives a sense of power and strength is complemented with a second grill on the rear panel, for a 360 degree perfect outlook. Small enough to fit anywhere, yet powerful enough to socialize with - perfect for today's consumers. Available in an array of colours we put together, and with a 3D mesh design option. The OEM possibilities for this beautiful designer speaker are tremendous.

Wireless 2.1 Audio with Extra Strong Bass

A built in Passive Subwoofer on the rear enhances the bass response, which adds to the powerful full range drivers to give a warm yet powerful audio experience. It plays music from almost ANY device - practically every smartphone, tablet or laptop has Bluetooth built in, and this speaker can receive and playback music wirelessly from all these devices. Plus with the additional Stereo Aux-Input jack built-in, even music devices without bluetooth can be connected and heard with the powerful high definition audio projected by this precision engineered speaker. An internal lithium battery keeps the music playing for over 5 hours on one full charge. And the ability to recharge the speaker battery from any available USB port (using the supplied USB cable) means universal convenience for every consumer.

Executive Elegance

This Bluetooth Speaker is designed with an understated classic elegance that is evergreen, with modern touches that add class and wide appeal. The stylish cloth grill is combined with a real brushed-metal trim that adds prestige and cutting edge design. Powerful yet portable - perfect for today's consumers. Available in an array of colours we put together, the OEM opportunities for this stylish speaker are limitless.

Wireless 2.1 Audio with Extra Strong Bass

A built in Passive Subwoofer (front firing) enhances the bass response, which adds to the powerful full range drivers to give a warm yet powerful audio experience. It plays music from almost ANY device - practically every smartphone, tablet or laptop has Bluetooth built in, and this speaker can receive and playback music wirelessly from all these devices. Plus with the additional Stereo Aux-Input jack built-in, even music devices without blue-tooth can be connected and heard with the powerful high definition audio projected by this precision engineered speaker. A full function control panel allows precise remote access to your music from the speaker itself, and an internal lithium battery keeps the music playing for over 5 hours on one full charge. Plus the ability to recharge the speaker battery from any available USB port (using the supplied USB cable) means universal convenience for every consumer.

Awesome Power for Indoors and Outdoors

When we set out to make a portable Bluetooth speaker for the sporty generation that likes to keep fit and enjoy the outdoors, we knew the challenges. And we met them full-on with our extreme engineering. Meet the NUKE, a portable boombox that is powerful and loud enough for the outdoors, with a built-in rechargeable lithium battery that keeps the music going for 6 hours.

But that's just half the story.

We also made sure that the NUKE delivers music with detail and bandwidth, so that it sounds equally awesome INDOORS, with crystal clarity and a deep resounding Bass response that inspires and captures your soul.

Form and Function - Perfection Redefined

Designers love to brag about "form and function" but we just raised the bar with the NUKE.

We incorporated a USB-MP3 player for the ability to share music instantly, and an SD-Card MP3 player that converts the NUKE into a portable Juke Box capable of holding and playing thousands of songs. We threw in an AUX-Input so you can connect to older phones without Bluetooth, and we added a professional microphone jack, with mic-level control, for all your potential PA or KARAOKE needs. Plus there is a built in FM-PLL (CPU controlled) radio tuner included.

All packaged in a powerful, rugged portable that looks, feels and performs like it came from tomorrow.

Features

- High Power Amplifier for Ultra Performance
- Twin Full-Range Drivers with Twin Passive Subwoofer Radiators
- Bluetooth A2DP – Wireless Audio from Tablets / Smartphones / Laptops
- Built-In Lithium Rechargeable Battery
- Charges from Standard USB Power (AC-Charger included)
- Super High Contrast LCD with Spectrum Analyzer
- FM-Stereo Digital PLL Tuner with Station Memory Presets
- Standard USB Charging Port Built-In (DC 5V Output)
